ARTECHNO

Artechno S.A. – Producteurs de microorganismes - Fabrication européenne

Segment: Feed additives – Biotechnology

Positioning: Innovative – Microbial solutions – Sustainable

Belgian biotech company specialising in the development of microbial-based solutions for animal nutrition, leveraging advanced fermentation technologies to improve feed efficiency and sustainability.

What makes them stand out:

- Expertise in **microbial and fermentation technologies**
- Development of **next-generation feed additives**
- Focus on **sustainable and high-performance solutions**

Applications:

- Feed efficiency improvement
- Gut health modulation
- Sustainable livestock production

Keywords:

Microbial solutions | Fermentation | Feed efficiency | Biotech | Sustainability

ARVESTA

[Arvesta | Homepage Arvesta](#)

Segment: Feed solutions & agriculture

Positioning: Integrated – Farmer-centric – Sustainable

Major Belgian group with extensive experience across the entire agricultural and animal nutrition value chain. ARVESTA provides integrated feed solutions and on-the-ground expertise to farmers, supporting performance and sustainability.

What makes them stand out:

- Major **Belgian player in animal nutrition**
- Covers the full chain: **farm → feed → performance**

Applications:

- Livestock feed including hourse
- Nutritional advice
- Farm optimisation

Keywords:

Integrated agriculture | Livestock nutrition | Performance | Sustainability

BENEO

Animal nutrition: Enhancing animal health

Segment: Functional ingredients (food & feed)

Positioning: Science-backed – Health benefits

Global leader in functional ingredients, backed by strong scientific expertise. BENEEO has long-standing experience in developing evidence-based solutions for digestive health and nutrition, including applications in animal feed.

What makes them stand out:

- Global leader in **functional carbohydrates**
- Strong scientific backing for **health claims**

Applications:

- Gut health (prebiotics)
- Low glycemic ingredients
- Pet & livestock nutrition

Keywords:

Prebiotics | Functional carbs | Digestive health | Evidence-based

Colonel Gustave

Colonel Gustave - Sustainable Petfood 100% natural

The logo for Colonel Gustave features the brand name in a bold, red, sans-serif font. 'COLONEL' is stacked above 'GUSTAVE'. The letters are thick and blocky, with a slight shadow effect, giving it a strong, military-inspired appearance.

Segment: Pet food (Dogs & Cats)

Positioning: Premium – Natural –
Transparent

Belgian premium pet food brand with strong expertise in natural, high-quality nutrition for dogs and cats. The company combines carefully selected ingredients and transparent sourcing to deliver balanced recipes adapted to pets' needs.

What makes them stand out:

- Belgian **natural pet food brand**
- Focus on **short ingredient lists & traceability**
- Strong emphasis on **animal welfare & sustainability**

Key products:

- Dry & wet food for dogs and cats
- Recipes adapted to life stages and sensitivities

Keywords:

Natural ingredients | Transparency | Premium pet food | Local sourcing

COSUCRA

Cosucra

Segment: Plant-based ingredients (food & feed)

Positioning: Protein transition – Circular economy

Internationally recognised expert in plant-based ingredients, with decades of experience in chicory and pea processing. COSUCRA is a key player in the protein transition, offering high-value ingredients for feed and pet nutrition.

What makes them stand out:

- Leader in **chicory root & pea-based ingredients**
- Strong expertise in **plant proteins and fibers**

Applications:

- Plant proteins for feed and pet food
- Prebiotic fibers (gut health)
- Sustainable ingredient sourcing

Keywords:

Plant protein | Prebiotics | Fiber | Circular economy

DUYNIE

Duynie - Creating new value

Segment: Feed ingredients – Petfood –
Co-products valorisation
Positioning: Circular economy –
Sustainable – Industrial scale

European leader in the valorisation of agri-food co-products into feed ingredients, contributing to a circular and resource-efficient food system.

What makes them stand out:

- Strong expertise in **co-product valorisation**
- Large-scale **industrial and logistics capabilities**
- Key player in **circular feed systems**

Applications:

- Livestock feed ingredients
- By-product reuse
- Sustainable feed supply chains

Keywords:

Circular economy | Co-products | Feed ingredients | Sustainability | Valorisation

ECI (European Colostrum Industry)

European Colostrum Industry, European leader in the colostrum market

Segment: Pet – Feed additives / Specialty ingredients

Positioning: Technical expertise – Customised solutions

Specialised company with strong expertise in bovine colostrum collection, processing, and valorisation. With roots dating back to the 1980s through research activities, ECI is today a leading European player, supplying high-quality colostrum-based ingredients for feed, pet food, and health applications.

What makes them stand out:

- Leading European specialist in bovine colostrum valorisation
- Unique expertise in collecting and processing colostrum while preserving **bioactive compounds** (immunoglobulins)
- Strong scientific and industrial background with **decades of experience**

Applications:

- Pet food & pet supplements (immunity, gut health, vitality)
- Young animal nutrition (early-life support)
- Feed additives for health and resilience

Keywords:

Colostrum | Immunity | Bioactive ingredients | Feed & pet health | Preventive nutrition

NATIX

[Natural Performant Bio-actives | Natix](#)

Segment: Pet food – Feed – Natural nutrition

Positioning: Premium – Natural – Health-oriented

Innovative brand developing natural and functional pet food solutions, with a focus on high-quality ingredients and health benefits for companion animals.

What makes them stand out:

- Focus on **natural and functional ingredients**
- Strong positioning on **pet health and well-being**
- Innovative product formulations

Applications:

- Daily pet nutrition
- Functional pet food (health support)
- Premium pet care solutions

Keywords:

Pet food | Natural | Functional nutrition | Premium | Pet health

PRODABIO

[Organic feed | Molens Dedobbeleer](#)

Segment: Organic feed – Agroecology

Positioning: Organic – Local – Sustainable farming

Walloon initiative focused on the development of organic and locally sourced feed solutions, supporting sustainable and agroecological farming systems.

What makes them stand out:

- Strong anchorage in **organic agriculture**
- Focus on **local sourcing and short supply chains**
- Contribution to **sustainable farming practices**

Applications:

- Organic livestock feed
- Local feed production systems
- Agroecological farming support

Keywords:

Organic feed | Local sourcing | Agroecology | Sustainability | Short chains

PROXANI

[Proxani | homepage](#)

Segment: Feed additives – Natural solutions

Positioning: Innovative – Natural – Health-focused

Company developing natural feed additives and functional solutions to improve animal health, resilience, and performance, with a focus on sustainable alternatives.

What makes them stand out:

- Focus on **natural and functional ingredients**
- Solutions targeting **animal health and robustness**
- Alignment with **sustainable livestock production**

Applications:

- Gut health and immunity
- Performance optimisation
- Alternative to conventional additives

Keywords:

Feed additives | Natural solutions | Animal health | Performance | Sustainability

Sanalio

[Sanalio | Organic food for dogs – Easy homemade ration – Sanalio.bio](#)

Segment: Pet food (Dogs) – Natural & functional nutrition

Positioning: Organic – Home-made inspired – Science-based

Belgian company offering an innovative approach to dog nutrition through organic, ready-to-mix meals inspired by home-made diets. Developed with veterinary and academic expertise, Sanalio combines nutritional balance, transparency, and sustainability to provide a healthy alternative to conventional pet food.

What makes them stand out:

- Innovative concept of “**simplified home-made feeding**” combining convenience and nutrition
- Strong scientific foundation: **developed with veterinarians and the University of Liège**
- Focus on **organic, minimally processed and transparent ingredients**
- Sustainable approach with **local sourcing and circular economy (use of co-products)**

Applications:

- Daily dog nutrition (**healthy, balanced and customisable meals**)
- Support for dogs with **digestive or sensitivity issues**
- Alternative to ultra-processed pet food (**natural & flexible feeding approach**)

Keywords:

Organic pet food | Home-made feeding | Vet-formulated | Transparency | Sustainable nutrition

SCAR

[SCAR scrl](#)

Segment: Animal nutrition & agricultural services

Positioning: Cooperative – Farmer-oriented – Regional

Agricultural cooperative providing feed, inputs, and technical support to farmers, with a strong local presence and expertise in livestock nutrition.

What makes them stand out:

- Cooperative model **close to farmers**
- Integrated offer: **inputs + advice + services**
- Strong regional anchorage

Applications:

- Livestock feed
- Agricultural inputs
- Technical and nutritional advisory

Keywords:

Cooperative | Livestock nutrition | Farmer support | Regional | Services

THT Biotic

[Probiotic & postbiotic producer | tht](#)

Segment: Feed additives – Functional ingredients (livestock & aquaculture)

Positioning: Science-based – Natural solutions – Performance & health

Belgian biotech company specialised in the development of innovative, natural feed additives derived from plant-based and bioactive compounds. With strong expertise in R&D, THT provides scientifically validated solutions to improve animal health, gut function, and performance, as sustainable alternatives to conventional inputs.

What makes them stand out:

- Development of **natural additives for feed**
- Expertise in **plant-based and bioactive compounds**

Applications:

- Gut health
- Performance optimisation
- Alternatives to antibiotics

Keywords:

Feed additives | Plant-based | Gut health | Sustainable performance

VANDEPUTTE

Vandeputte Group - Family Company founded in 1887

Segment: Functional oils & fats (feed & pet)

Positioning: Expertise – Functional lipids
– Multi-sector

Belgian company with long-standing expertise in processing and valorising oils and fats, offering functional lipid ingredients for feed, pet food, and industrial applications.

What makes them stand out:

- Deep expertise in **lipid processing and functionality**
- Wide range of **applications across industries**
- Focus on **high-quality and tailored solutions**

Applications:

- Feed and pet food (energy, palatability)
- Functional lipid ingredients
- Industrial applications

Keywords:

Oils & fats | Functional lipids | Feed ingredients | Expertise | Valorisation

WALAGRI

[Walagri | Accueil](#)

Segment: Feed distribution & agricultural supplies

Positioning: Local – Service-oriented – Multi-product

Regional player supplying feed, agricultural inputs, and services, supporting farmers with tailored solutions and proximity services.

What makes them stand out:

- Strong **local presence and proximity to farmers**
- Wide portfolio of **feed and agricultural products**
- Service-oriented approach

Applications:

- Livestock feed
- Agricultural supplies
- Farm support services

Keywords:

Feed distribution | Agriculture | Local services | Farmer support | Multi-product
